

# Folding tip for difficult model

E.T.

Jun Meakawa  
Unit: Top Origami

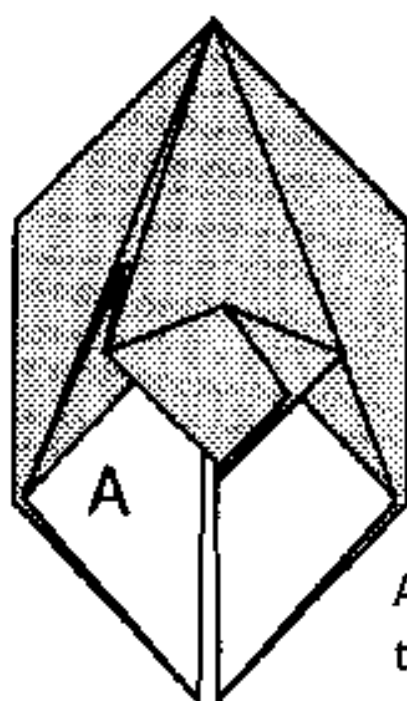

Each pair of diagrams shows the same phase in folding:  
A in front and B at the back.

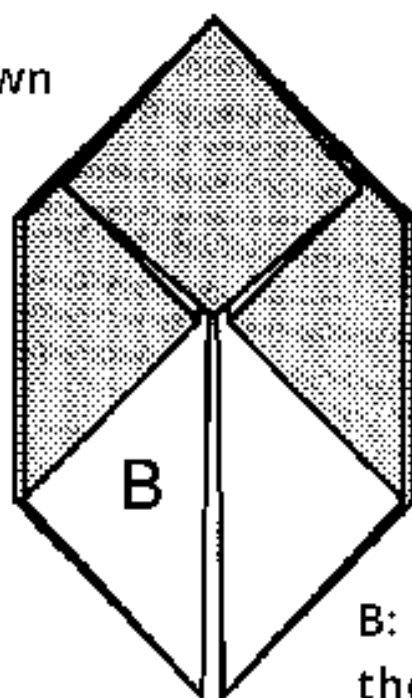

And in each diagram the right part shows the folds you  
should make after the folds from the left side.

The letters A and B on the first page are drawn inside  
the model, but should be outside.  
The A and B in the crease pattern show (correctly) what  
will be front and back.

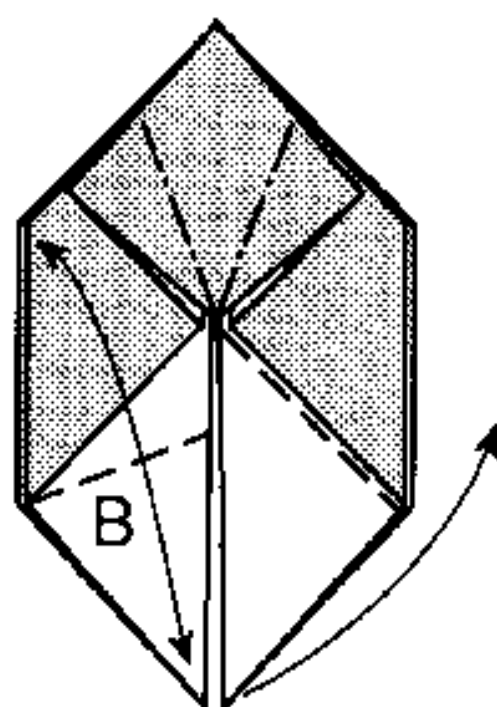

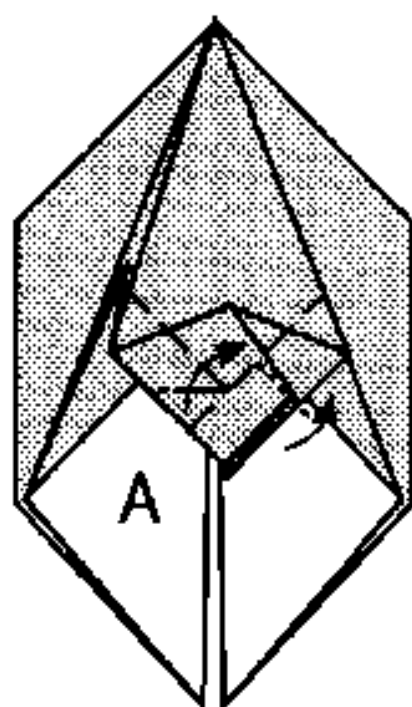

Precrease and collapse as shown  
in the following diagram(s)

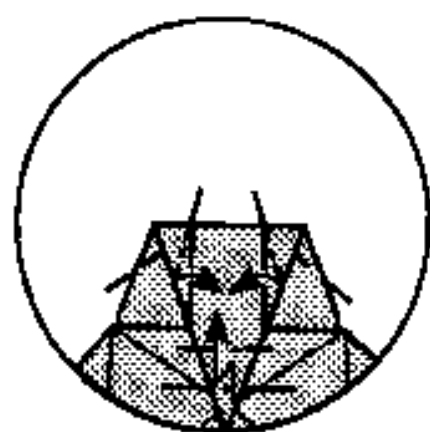

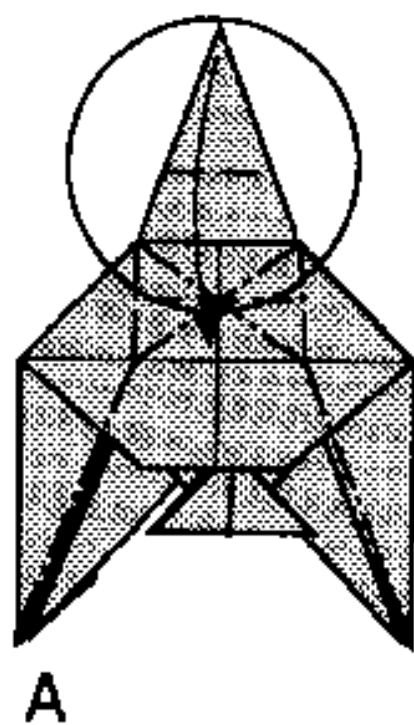

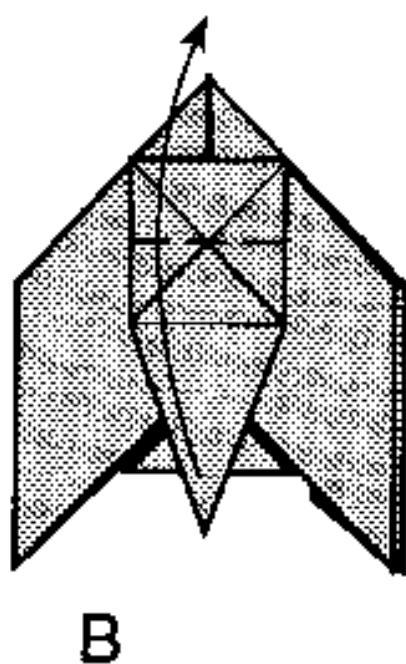

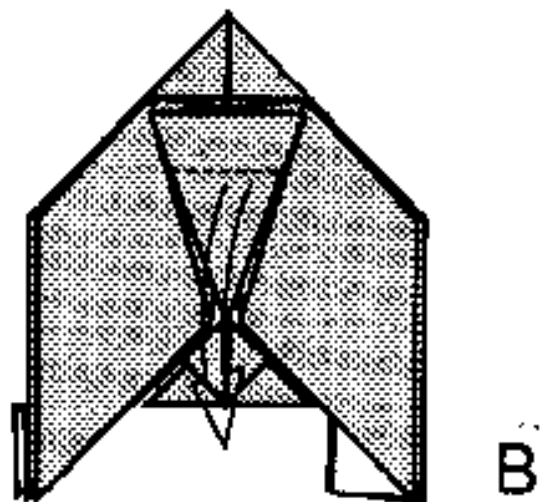

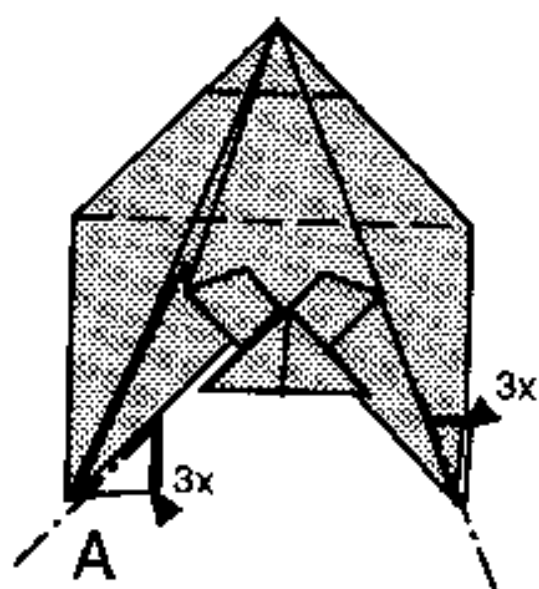

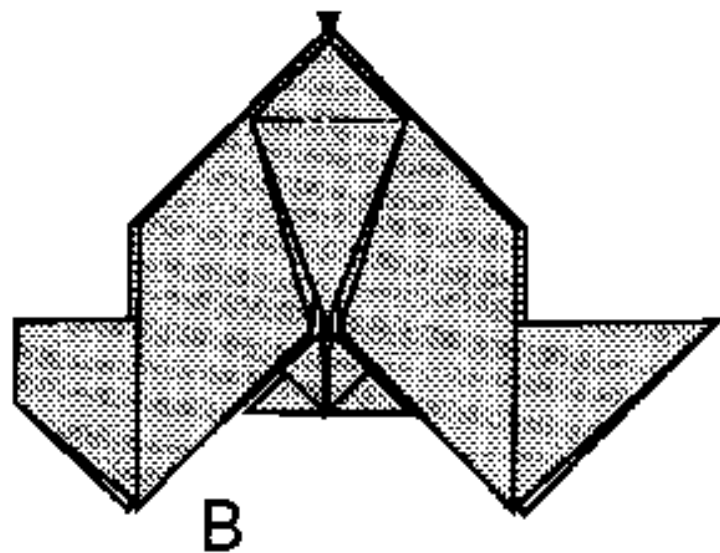

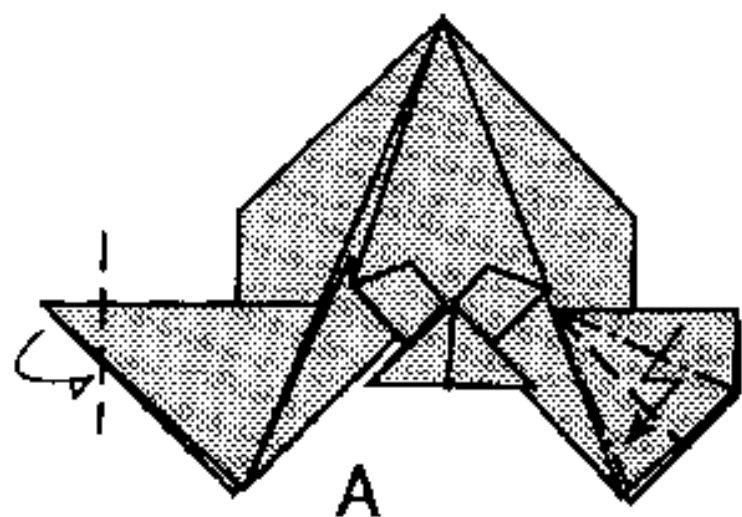

A: lower right part of  
the previous diagram

B: upper left part of  
the previous diagram

Now form the hands  
and ET is there
